

**DUE TO RECENT INQUIRIES CONCERNING TREE REMOVAL THE BOARD OF DIRECTORS OF STONEY GLEN WEST ASSOCIATION ADOPTED THIS POLICY ON REMOVING TREES ON JUNE 8, 2011.**

A member may remove any tree that is allowed by the Covenants of the Association without notification or approval of the Board. Trees that are within this approved category are those that are less than six (6) inches in diameter at a point two (2) feet above the ground level.

Additionally the covenants allow removal of trees within ten (10) feet of a building or within ten (10) feet of the site of an approved building unless such removal will substantially decrease the beauty of the Property. The owner must receive prior approval from the Board that the tree to be removed satisfies this criterion.

The Board will look favorably on requests for removal of a tree that is "sick" or is leaning toward a building unless removal of the tree will substantially decrease the beauty of the Property. The owner must receive prior approval from the Board that the tree to be removed satisfies this criterion.

Approval to remove a dead tree will be granted after inspection to ensure that the tree is dead or beyond hope of recovery.

Removal of any other tree must be approved by the board. Failure to receive approval prior to removing any tree may result in monetary fines. The Board will consider each request on the merits of the request and on the resulting change in appearance of the Property.
